Density of T under H_0: $f_T(t \mid \theta_0)$
Density of T under H_1: $f_T(t \mid \theta_1)$
Density of T
Acceptance region (Accept H_0)
Critical region (Reject H_0)
Critical value c
Test statistic value t
β = P(Type II error) = P(Accept H_0 | H_0 false)
α = P(Type I error) = P(Reject H_0 | H_0 true)
